LIVE STEAM UK LTD

GAUGE 1 LIVE STEAM STANIER JUBILEE

The elegant Stanier Jubilee class was a model we always wanted to bring to gauge 1. After much research we have chosen to produce the later, long firebox variant with 4000-gallon Stanier riveted tender which to our eyes looks more balanced than the Fowler tender variety. The model features our well proven gas fired ceramic burner delivering excellent performance with prototypical Walschaerts valve gear three-cylinder operation.

Available in LMS crimson Lake and British Rail Brunswick green liveries.

There is a choice of 26 names available on a first come first served basis. As with all our models this is a limited-edition production run so please contact us without delay to secure your model as there will not be a second production run.

SPECIFICATION

Gas fired boiler with ceramic burner and fine control valve.

Three cylinders with fully functioning Walschaerts valve gear reversible from the cab.

Axle pump with bypass valve for refilling under steam.
